

"I AM ON IMMUNO-ONCOLOGY THERAPY"

Be aware of patients who hold the following materials informing you that they are on immuno-oncology therapy:

- Wallet card
- Medical bracelet
- Immuno-oncology therapy letter

Immuno-oncology therapy may increase occurrence of immune-related toxicities such as:

Champrat S, et al. Ann Oncol. 2016;27(4):559-574.
Brigden M, et al. Oncology Exchange. 2016;15(3):10-14.
Kumar V, et al. Front Pharmacol. 2017;8:49.

Management of immune-related toxicities requires prompt coordination with a medical oncologist and may require initiation of high dose corticosteroids. Referral to the appropriate subspecialty may be required.
